Legion Notes

Comrade Greiner reported on the county council meeting at which nearly every post in the county was represented. Many thanks for and against the 1931 national convention to be held in Los Angeles were heard from. After four hours of arguments pertaining to the convention, a final vote was taken. The result was that Los Angeles will bid for the convention for 1931, when our delegates attend the national at Boston in September. Delegates from our Post were instructed to vote against it, but as the majority voted for it, we too will join with the other posts of the county and boost for Los Angeles as an ideal city for a national convention.

Comrades Stanger and J. F. Jones are improving from sickness and we hope to see them soon at our meetings. Our quota for 1930 membership is far from the number which we should have before this date. Many of the comrades know of prospects whom they could sign up. Invite that prospective member to our next meeting. He will enjoy the meeting and appreciate the invitation. And you too will encourage the commander and officers by doing your part. Many important things are to be taken up during the year, but membership is first. We should be planning for the membership party, whether the navy goats or the army mules or beans is not decided at present. Let's get those members and not be in the back lines.

Legislation affecting the veterans of the world war has been compiled in pamphlet form. The price is ten cents and every comrade should have a copy. Those wishing copies send the adjutant or inquire ten cents in a letter and mail to P. O. Box 494, Torrance. Veterans wishing to file tax exemption must do so before June 30. It is necessary that you make application or exemption will not be given. In any way we can be of assistance to you, comrades, write to one of the principles of the American Legion.

Our last meeting was snappy, peppy and fun. The speaker, the entertainment committee sure did well. Mr. James, who is associated with Unger and Watson, Majestic dealer, was the speaker for the evening. His speech was very interesting and enjoyed by all the comrades. His services were greatly appreciated and we hope that Mr. James will return for another evening.

Our post now has an employment committee. C. E. Conner, Don Baxter and Chas. E. Myers. There is plenty of material for this committee in the community. At the present time, if anybody who has work or a position, kindly get in touch with this committee. They may have the person whom you wish to employ and boost the employment situation in our own city. The 19th district meeting is at Downey, March 21. Everybody is guaranteed a good time and eats. All comrades wishing to attend, please be at the First National Bank at 7:30 p. m. We haven't seen many of the old time members of the post present at the meetings. Some are reserving the second and fourth Tuesdays for attending the meetings. Plan to be at the next meeting March 25. Maybe you can help us or that we can help you. The programme committee for next meeting is Greiner, Turner and Harder. We don't know if Tommy will entertain (the usually does). See you Tuesday night.

Editor's Note—In this, the second of a series of articles on snakes, A. V. Napier, managing editor of the Journal-Mirror of Prescott, Ariz., explodes the popular myths regarding hoppers and joint snakes. Mr. Napier, an authority on reptiles will contribute two more articles on this subject. The next one will appear in the Torrance Herald March 27. (Written for the United Press) (Copyright, 1930, by United Press) Who has not heard of the deadly hoppersnake with the poisonous horn at the end of his tail? Hoppersnakes are supposed to take their tails in their mouths and roll. Every body has heard about the hoppersnake rolling after a man who dodged behind a tree. The snake "spared" himself into the tree by mistake and was so wedged in that he was easily dispatched by his intended victim. But the tree died. As a matter of fact the so-called hoppersnake is not a snake at all but is a lizard. It has eyelids and closes its eyes, as all animals do. It is perfectly harmless and does not under any circumstances "roll." It has a horny growth at the tip of its tail and if attacked will thrust about, striking with its tail. It has no teeth and its tail is not poisonous. The jointsnake is another popular myth. The jointsnake, so the story goes, has the power to throw itself

Snake Yarns Interesting But Are Merely Stories

apart like a jointed fishing pole. This is done when attacked to convince the attacker that the snake is thoroughly dead. When the attacked leaves the joints wiggle back into their respective places and the snake crawls off as good as new. There is a certain grass snake whose tail, beyond the body roadway comes apart if struck or pulled. Above the tail the snake is just like any other creature. If pulled apart above the tail death would immediately result. When a part of the tail is broken off the end heals over and the lost part is never retrieved. Many lizards lose their tails in the same manner. Many honest people will say that they have seen young snakes crawl into their mother's mouth for protection. However sure these observers may be, they are in error. No baby snake ever runs down its mother's throat. Snakes do not care for their young. With the exception of rattlesnakes, virtually all reptiles lay eggs and they do not see them again. Young snakes may be seen with adults, but they are more than likely not related. At the approach of a human the little snakes may appear to run into the larger snake's mouth, but a baby snake has a way of disappearing into the smallest of hiding places. If search is made under such circumstances the baby snakes will be found hiding under a leaf or other unsuspected object.

The Chevrolet Motor Company and its dealers are pleased to announce a new service policy—one of the most liberal ever offered on a low-priced automobile.

Put into force as a written agreement given to the purchaser by the Chevrolet dealer when the car is delivered—it offers the following provisions:

- 1 Every Chevrolet owner receives his car from the dealer in perfect condition—thoroughly lubricated, properly adjusted, and ready to operate efficiently from the first mile of ownership.
2 Every Chevrolet owner is entitled to free inspection and adjustment of his car at the end of the first 500 miles of usage.
3 Every Chevrolet owner is entitled to free inspection of his car every 1000 miles thereafter, so long as the car is in operation.
4 Every Chevrolet owner is entitled to free replacement of any part which may prove defective in workmanship or material, within the terms of Chevrolet's standard warranty. This includes both parts and labor.
5 Provision number 4 will be carried out by any Chevrolet dealer in the United States. As a result, the Chevrolet

owner may travel to any part of the country, with assurance that the guarantee on materials and workmanship will remain in force. This new policy constitutes proof of Chevrolet's high quality—for such liberal provisions could only be made in connection with a car built of fine materials to exacting standards of workmanship. Back of this policy, and assuring its successful operation, is one of the most complete and efficient service organizations in the world. There are more than 10,000 Authorized Chevrolet Dealer Service Stations in the United States alone. Each employs skilled mechanics thoroughly trained at Chevrolet Service Schools. Each has specially designed tools and machinery developed exclusively for Chevrolet service work. And each has on hand, at all times, an adequate stock of genuine Chevrolet replacement parts. Chevrolet's flat-rate charges, including both parts and labor, are the lowest in the industry on many service operations! In considering the purchase of a low-priced automobile, think what this service means—in terms of lasting satisfaction, as well as in increased economy.
